EDUCATION

Examination	Major	Institute	Year	CGPA (%)
B.Tech	Artificial Intelligences & Data Sciences	Karpagam College of Engineering	2026	8.10

EXPERIENCE

AI/ML Intern,

Better Lives (*INVYPRO*) Product Based | Coimbatore, Tamil Nadu ***Aug 2025 – Jun 2026***

RAG Chatbot (Full-Stack) | Nest js,FastAPI,MongoDB,AzureOpenAI,LangChain,RestAPI

- Built full-stack AI chatbot with NestJS frontend and FastAPI backend, implementing JWT authentication, RBAC permission System, and Redis caching to enable users to query **120+ MongoDB** collections using NLP.
- Integrated LangChain with fine-tuned Azure OpenAI GPT-4o-mini and Guardrails AI to generate MongoDB queries for company employees**, Achieving 95% accuracy**, reducing costs, and cutting processing time
- Developed dynamic Markdown response system with template types and deployed via Azure DevOps CI/CD pipeline with Google Tag Manager tracking and real-time monitoring**.**

Associative AI Engineer Intern,

Trinity Mobility, Product-Based | Bengaluru, Karnataka ***Jun 2026 – Present***

AI Parking Assistant | n8n, Python, LangChain, LiteLLM, Ministral, Whisper, DeepEval, Langfuse.

- Built an AI-powered parking assistant using n8n, Python, LangChain, and agent-based tool calling to handle location detection, parking search, vehicle selection, date/time processing, and slot booking.
- Implemented LLM evaluation, observability, and model gateway infrastructure using DeepEval, Langfuse, LangFlow, and LiteLLM, with Ministral and Whisper for text and voice-based interactions.
- Implemented AI safety and engineering practices using Guardrails for prompt-injection and toxic-content detection, with PostgreSQL/Neo4j for data management and SonarQube, Jenkins, Git, and GitLab for code quality and CI/CD

PROJECT

Navigation Voice Assistant (College Project) | *Python, MobileNetV3, Tesseract OCR, Computer Vision* ***[Jan '26]***

- Developed a voice-activated accessibility application using **multi-modal AI** to generate real-time audio descriptions of visual content for visually impaired users.
- Integrated computer vision and **OCR** pipelines using MobileNetV3 and Tesseract to detect objects and extract on-screen text accurately.
- Implemented fully on-device processing with optimized deep learning models to ensure user privacy and eliminate cloud dependency.

SKILLS

- **Language** :Python, Javascript,SQL,MongoDB, Neo4j,Chroma ,Vectorsearch,Embeddingmodels.
- **Frameworks:**Django, Apache Hadoop, TPOT, H2O.ai, LangChain, AgenticAI,MCP.
- **Libraries:** Pandas, NumPy, Scikit-learn, Matplotlib, TensorFlow, Keras.
- **Tools**: Docker, Git, GitHub, Tableau, Power BI, N8N.
- **AI/ML:** LangChain, Azure OpenAI, Fine-Tuning, Guardrails, Text Normalization, Data Preprocessing.
- **Platforms**: Jupyter Notebook, Visual Studio Code, Google Colab, PyCharm.
- **Soft Skills:** Teamwork, Leadership, Communication, Active Listening**.**

CERIFICATES

- **MongoDB** | RAG with MongoDB ***[Sep'25]***
- **Qlik** | Qlik Sense Business Analyst Qualification ***[Aug'25]***
- **Neo4j** | Introduction to Neo4j Graph Data Science ***[Aug'25]***
